
2007 CQ WW WPX CW Contest

Expanded Results

QRM

DX

First time entered as a 2E0 (ex-M3CVN) and the rare prefix helped to get a good score on all bands. A smaller score, but 200 QSOs more than SSB WPX. Plenty of QSOs which is nice! First time I got over 1000 from the home QTH . . . **2E0CVN**. Started 5 hours late due to putting up antenna and being visited by Murphy! Then rig worked intermittently. Better luck next year! . . . **3D2EE**. Just partial contesting this weekend . . . **4O3A**. Big storm lasted 6 hours and no operation . . . **4O5Z**. We had 7 hours of forced QRX for power failure but still a lot of fun! . . . **5D5A**. Great conditions to Europe . . . **6H1ZVO**. A short vacation operation from Hvar island, Croatia . . . **9A/OK1CZ**. Good propagation but bad luck! Saturday afternoon 2+ hrs. of thunderstorms. Nice opening to USA late evening. Sunday morning only few hours of operation; thunderstorm started at 1115Z and ended Monday morning . . . **9A2U**. I would like to dedicate this effort in memory of Festus, 9M8FH, who became a silent key earlier this year. He had been a good friend of mine for the past 16 years and will be missed deeply. Conditions were probably at the absolute bottom (at least I hope) . . . **9M8DX**. Seems like a 1–2 KW contest only. You have no chance working 100W . . . **A45WG**. Hello, gang, I'm HK1KXA and am back. Many thanks to Ramon Paredes (Paserco) who made possible my return to the contest arena by letting me use two of his tower cranes in Torrent (Spain) to hang my wire antennas. Next time beware! It will be aluminium elements . . . **AO5KXA**. It was a very very good contest. See you in the next contest . . . **AO8R**. First WPX CW from 5B for years even though I had to catch a flight out several hours before the end. Enjoyable as always. Many thanks to 5B4ES for hosting me once again . . . **C4W**. Was fun even though score is not as high as last year . . . **C6AYM**. Tnx Roberto, CE4CT, for hosting and sharing your time to help me. What a pity condx were not quite good, but it was interesting to find OM's anywhere. CW party was great. CQWW is the contest. Congratulations to everybody who was behind the scenes . . . **CE4CT**. Another fine contest. Will be in it next year . . . **CS1GD**. Glad to have the chance to give the multiplier to some stations. I used my home station in Funchal, capital city of Madeira Island . . . **CT3EE**. Again good fun. Low bands were very noisy due to QRN! It was almost impossible to work on 160m! . . . **DA0I**. My third WPX. Hmm, but worst performance ever. About 20% ops did never answer my calling, even S9+ stations. Sometimes called over 15 minutes with no answer. Should give up contesting. Tks to all ops and also to the CQWW team for organization and work! . . . **DD1IM**. Mni tnx fr nice contest. Cu agn next year . . . **DF1HE**. Only S&P. 10-15-20m: 3-ele FB-33 14m ag. 40m: dipole 2–3m ag, the dipole is a spare for receiving, lying 1 meter on a metal balustrade. So big cheers for all 14 USA stations with really big ears who heard me, sometimes on first shot! . . . **DF2LH**. Sorry for many "nr?" requests. Lot of QRN up to over S9 caused by thunderstorms and heavy rain. But it was again a fun contest from a new QTH with new antennas. Condx

were much lower than last year. See you in the CQWW DX SSB & CW with my other call, DL1RG . . . **DG4R**. Just to give out some points and also to send out my lovely CW call. Tnx to everybody who got it correct and did not log me in the Philippines or similar . . . **DH5HV**. Strong thunderstorm and rain on both days . . . **DH5MM**. Strong signals from South America, but I worked only four stations from this DX area. All SA stations without 10m on the air? . . . **DJ1AA**. Strong thunderstorms, much QRM, no fun. (QRP 5 watts from FT-817 via antenna tuner Z11 to Windom FD3) . . . **DJ3GE**. I am quite happy with my result considering that I just used a dipole and an R7 vertical, no beams. Anyhow, it's been my best result ever. Enjoyed the good condx to the US on Sunday afternoon and the great short-skip opportunities on 10m! . . . **DJ3WE**. It was pleasure taking part in the contest. Conditions were not so good. We missed JA stations at all bands. Something better was the situation on 40 and 80m . . . **DJ7LH**. Don't forget, the fun is the power! . . . **DK3RED**. High power helped me for short-skip scatter propagation on high bands . . . **DK7AN**. Lot of thunderstorms both days. Next year maybe better . . . **DL1JBE**. Many a mickle makes a muckle . . . **DL1YFF**. Sorry I had time only for some contacts. A little band opening of 10m gave me the possibility for some contacts with European stations and this all with 20W and 7m wire. It makes a lot of fun . . . **DL2EF**. Good condx on 10m and 15m. See you next year . . . **DL2MDU**. See you next year again, then with 80m and 160m . . . **DL2YCA**. Rig ICOM IC-728, 100 watts only, one dipole up 10m. Quickly changing conditions with good openings on 10 to 40 m. Extreme QRM by thunder and lightning on 160/80/40m all the time. Had fun again with N1MM's logger. Thanks to all for endurance test . . . **DL5KUD**. Beautiful contest agn. Nice short skip on 15/10m but few DX there. Much QRM and limited operating time caused by thunderstorms. See you next year! . . . **DL7UMK**. Fine business worked with SD . . . **DL9ZWG**. Nice contest! I'm happy to work many new countries with QRP . . . **DM1LM**. Great activity on the bands, less on 10m. The spread has not been very good. Thanks to all the OMs and up to a new QSO . . . **EA8MQ**. Tnx, Julen, EB2BXL, to let to us use your QTH for the contest . . . **EC2DX**. Just enjoying myself . . . **EI4CF**. Terrible lightning condx during the whole contest. Wow! . . . **ES1CW**. Tnx fer fb contest! . . . **ES4MM**. Very bad conditions this year. All interruptions due to thunderstorms in succession! Will try to do better next year! . . . **F5UL**. Good conditions this year. 10m very active with EU openings. Some good DX for me on QRP: HC8N in the middle of a West Coast pile-up! The weekend but I enjoyed it very much . . . **F6FTB**. Really hard work. Difficult to get runs going. Mostly search and pounce . . . **G0MTN**. Part time operation only due to my new parental responsibilities. Great to see some nice openings on 10 metres. Thanks to everyone who called me and see you all next year . . . **G0WKW**. Conditions poor. Used SD for logging. Performed very well as usual! . . . **G2HDR**. Rig ICOM IC-756 Pro III, 100W, antennas 85 ft. lw + counterpoise. Good to hear 10m so open as well as

20 in the evenings . . . **G3JJZ**. Condx much the same as last year. Still hard going on QRP, but very enjoyable contest. CU next year . . . **G3LHJ**. Poor condx. Had to hunt for USA! Hate those long Balkan callsigns, absurd! . . . **G3RWF**. Some of the WPX contest special prefixes which have loads of "dits" can be difficult to copy when they come at you for the first time at 36 wpm! . . . **G3TXF**. With poor conditions and my inefficient antenna this was hard work! It was a real struggle, especially around Sunday lunch time. Still it was fun . . . **G3VQO**. I really only entered to fill some of my 2007 band slots, so was not seriously entering. But I had a little bash on the Sunday to give away some points. Conditions generally poor, but good sporadic-E on 15m and 10m. Very high static level on 40m . . . **G3YMC**. Roll on better conditions! Some dreadfully wide signals very inconsiderate and poor operating by some stations . . . **G3ZRJ**. First time have entered this contest and only did it part time. Conditions were not that great without a beam and a lot could not copy my 100 watts. Nice to meet a lot of old friends in the contest . . . **G4FOC**. Thanks to Paul, G6PZ, for the use of his great station. Lack of a top-notch 40 metre antenna hurt me badly, but Paul's new 4-over-4 SteppIR stack rocked on 15 and 20. Conditions were bad? I didn't really notice. This contest is always lots of fun . . . **G6PZ**. Aired our special events callsign (GB6GW) from my station for a couple of hours as part of the 75th anniversary celebrations of Blackwood & District Amateur Radio Society. All QSLs via GW0TKX . . . **GB6GW**. Had to give up after 23 hours. Too tired! . . . **GM0F**. Conditions lousy. Pity I didn't have more time . . . **GM3WUX**. When I found 10m open on Saturday I decided to have a go. Conditions up here in the north variable. No DX heard, only Europeans. A lot of QSB on the signals with many requests for repeats on serial numbers, so I guess a lot of mistakes . . . **GM4FDM**. Good to see some real activity on 10 and 15m. There is no incentive to use 160m in this contest . . . **GM4SID**. The GX prefix seemed to cause a lot of confusion. It's an English club prefix. Part time operation as part of an exhibition station during Scout centenary special event station . . . **GX0SAC**. Tnx fb contest! . . . **HA2ESM**. About the same number of Q's with less claimed points is the result of this year's contest. No 80 meter operation possibility is available with the new antenna. It was a fun to take part anyway. Thanks for Q's. See you next year! . . . **HA2MN**. Rather poor condx, but 10 was open to EU. I had two unwanted stops due to thunderstorm. Next year I will be in HP (hopefully) . . . **HA3NU**. Only limited time available for this contest . . . **HB9CIC**. Very strong QRN in HB9. Thunderstorms all over HB9/central-southern EU for weekend. Time lost due to lightning protection by stn shutdown. Nice openings however on 10m. Otherwise mostly poor HF condx. Good test opportunity, e.g. on 40m . . . **HB9CVQ**. Very good activity on the 20 meter band. My K2 and my antenna worked fb. Cu agn in the next contest . . . **HB9DAX**. With some family obligations on Saturday I could only enter this year's WPX in the middle. I decided to stick to 20m this time. Condx were not very good as expected, but I had my usual share of fun and hope to meet all of you again in the next years . . . **HB9DDO**. QRN, storms, TVI, etc. . . . **HG8K**. Enjoyable CW contest during the Saturday evening. This year I had not enough time for full time competition. Propagation is still on dark side but wish more better and big signals next year. Thanks to all callers when I running CQ test . . . **HL1VAU**. Had a power break during Sunday for 4 hours. Murphy was calling! have not had a break in years, but of course the only weekend in the year when power was

needed a tree fell over the power lines! . . . **HS0ZDY**. Not many stations on. Several Europeans loud but no reply . . . **HS0ZEE**. Very nice contest. I enjoy it. Good conditions on 10 and 15 meters. Perhaps begins the new solar cycle? . . . **I2AZ**. What a surprise the shining 10m (worked K3OO at 2230Z!) and the huge EU pile-up. Super 20m with good US pile-up at times and 40m as well . . . **I2WIJ**. Light setup and three ops only. Played around with a few switches and a power splitter. Some troubles with both PAs kept one and sometimes both stations off for a few hrs. Guess we're at least 1m short . . . **IR4X**. Worked with a simple dipole for 40m and pwr was 100 watts . . . **IS0XDA**. A lot of big fun on 10 meters after a very long time! Es to central Europe was really good. Some incredible QSOs with USA during Saturday night. Just a couple of JA's in log. A lot of strong QRN on Sunday afternoon/evening because big thunderstorms . . . **IU9S**. Very good test . . . **IV3DYS**. A lot of thunderstorms, QRN and static! . . . **IZ1DXS**. I was late by two days to get to my contest QTH on Thassos island, Greece. Arrived Sunday afternoon, just after I drove 1400 km. Put up my monobander gp's and started. My rest man power was enough for this result, hi . . . **J48HW**. Had an enjoyable time. Thank you . . . **JA1CP**. Tks for the nice contest . . . **JA1TMG**. Many thanks contest everyone . . . **JA2AXB**. I made some mistakes to make vacant or double numbers because of a bug in my homebrew software . . . **JA7COI**. Despite the not-so-good condx, we enjoyed part time effort and BBQ's. Hope to do it for a full time operation maybe next time . . . **JA8RWU**. Enjoyed my first participation . . . **JE1NVD**. I enjoyed the contest . . . **JE1RRK**. I entered single-op 160m low power. The condition between the USA and JA was not so good, but I could QSO with AA0RS. His signal was 599+, very strong! I used M.V. (micro vert) antenna for 160m in this contest. It was very fb. Its gain was nearly equal full-size dipole . . . **JE1SPY**. I enjoyed the contest . . . **JF1NZW**. First time in WPX CW. Enjoyed it. Thank you for the organization . . . **JG5DHX/5**. I enjoyed the contest . . . **JH1DVG**. My body was not in good condition. Also condition during the contest is not good, isn't it? . . . **JH2NWP**. I was able to enjoy the contest though was a short time . . . **JH1ALP**. Unfortunately, I could not contact mainland US stations on 15m band. But we have so many new participants from China. . . . **JJ6TWQ**. Rig output power used less than 5W . . . **JK1TCV**. It was so poor condx for low power from the Far East. I have learned many things in this condx . . . **JQ6PAQ**. The aurora level >6 and high Kp really made this a tough one for us most of the weekend. Thanks to all who took the time to turn their antennas towards KL7 . . . **KL2R**. Under such condx there ought to be a premium for working W's. Could work all EU all day and night on all 5 bands, but DX only on 20 and 40, where they drowned in the EU QRM. Twas fun anyway, and I'll still come back . . . **LA6CF**. Many thanks for contest. Sstation TO3T is special prefix from LU . . . **LU4MHQ**. Spent almost 22 hours on the air at my age of 88! 73 & cu! . . . **LY1BX**. QRN, QRN, QRN, lightning all around all weekend long . . . **LY2IJ**. Vy vy nice contest! . . . **LZ3YV**. Thanks for this nice contest! . . . **LZ8A (LZ2BE)**. Some nice Q's on 10m making this a lively contest. IC-756 PRO, 5W, and inverted-L for 80m tuned with a HB remote ATU. N1MM worked perfectly! . . . **M0BPQ**. Great contest and bands very busy at times. Managed to spend a reasonable time in the contest. Logging with SD and using WinKey makes things smooth . . . **M0DHO**. My first CW contest and what a fine experience. Almost without exception I met patient and helpful QSO partners willing to spend a little extra time to help me get everything

right. I will do this again! . . . **MØTBF**. Only able to operate a few hours due to travel. Great fun and lots of activity on 10 meters. Very welcome indeed! Rig FT-2K, quadra, Butternut vertical all bands . . . **MDØCCE**. Best fun I had in ages running on 10m sporadic-E just like solar max but not DX . . . **MUØFAL**. Busy most of the weekend. I wanted to give some extra points away with the Reading Club's MX call. Great fun . . . **MXØAAA**. We chose M/S in WinTest and so we handed out separate serial numbers for each band. Hope it will count. We will investigate in this problem . . . **OE2S**. Had a bad time with antenna (3-el tribander) showing no directivity. No place for 30 degrees Celsius, could not stand the entire contest and decided to better and get hopefully a better entry with full operating time . . . **OE5CWL/6**. A lot of fun despite generally bad propagation and QRN. Thanks to OH6LI for the station and to OH3AG for the callsign . . . **OF3F**. This was the first time to work all band contest from this new QTH. I am gradually moving the antennas from the previous location (OH2PM) to Kiikala. Until now only a tribander that is intended for when the second radio is up . . . **OH1PS**. This was not one of my most focused contest efforts. The sister of my wife had a birthday party in our house on Saturday. Small children were everywhere. Musician's ear plugs helped a lot. I had to make the smallest ones sleep during the prime hours of the contest . . . **OH3BU**. Good short skip on 15m and 10m but not so good conditions for DX . . . **OH6NIO**. What a bad contest it was for me this year. Stormy weather (QRN). No QSOs with NA, SA, JA. I hope better condx, weather, and result next year. Thanks to all who heard my QRP signal in the noise and I look forward to meet you in CQ WPX contest 2008! . . . **OK1DSA**. A lot of stations. Only weather conditions were bad, strong thunderstorms at my location. I am looking forward to next CQ WW WPX contest . . . **OK1LO**. Ham radio Skanzen Activity Weekend Hrsaw, hi . . . **OK1TC**. Thank you for very nice contest! . . . **OK5MM**. Many storms, vry QRN sorry . . . **OL4M**. Very interesting condx with storm in Europe . . . **OL4W**. Big QRN and lot of storms all time. Good contest . . . **OL6P**. Tnx prima contest! . . . **OM3BA**. Tnx for nice contest . . . **OM7YC**. It was fine to participate in this contest. My output was 5 watts . . . **ON3AD**. Nice to work a hundred or so stations on 10m at the sunspot minimum! Great to work some new prefixes towards my WPX Award. Contests are fun. QSLing those contacts is even more fun! . . . **ON4CAS**. Very very good time spent with CW friends of the world! . . . **ON5SV**. As usual much activity in this fine contest. 10m band was open for Europe. It is always fine to work in this contest. Till next year. I hope to have more time to work some more hours . . . **ON5WL**. Nice contest with much activity. Like always it's fine to work in this contest . . . **ON60MCL**. OU3, a new prefix for the first time in CQ WPX, but what a disappointment! Three out of four stations questioned the call by coming back to me . . . **OU3A**. After using 5P1ER years ago in another WPX and with very little success (as operators received it as HP1ER) I selected OV3X in March 2007 for my second callsign and a call to be used in contests. However it was hard as people simply just don't trust themselves . . . **OV3X**. Heavy QRN on the second night from thunderstorms made copying stations a real challenge . . . **P40A**. Very nice contest but condx only short skip! . . . **PAØADT**. Whitsuntide and my birthday did not help very much. Nice sporadic-E conditions. Somehow could not work much on 80 and only three on 160, but 9M2 for the first time new DXCC so glad enough. Is it sensible to do CW in such a very fast speed? . . . **PAØFAW**. Like every year a very pleasant event with the

Pentecost weekend giving a lot of breaks for the family, so a real part-time participation. Thunderstorm crashes on the Saturday night made me stop operating so the score for 80m only is pretty low . . . **PAØMIR**. Nice contest. Using SD logging program without any trouble . . . **PAØWKI**. Worked QRP with my FT-817 and inverted-V. Best DX were HK1X and HC8N in the last hours of the contest (hi). Thank you for the nice contest . . . **PA1B**. Even for a few hours with 100 watts and simple antennas competing was fun. See you next year! . . . **PA1BX**. Enjoyed this contest from our Field Day 2007 . . . **PA3AM**. Whitsunday has been family day for a couple of years so did not check 10m es 15m second time after some Es QSOs on Saturday (QRV agn at 20.00Z). No thunder es lightning both days was more than expected. This one is in my top 5 list. Wkg condx Ten-Tec Orion . . . **PA3ARM**. Thanks for this contest. The propagation was terrible again . . . **PQ4F**. First time using N1MM. First time Assisted. Great. Got hooked! . . . **PR5W**. Thanks fb contest . . . **PS7DX**. Nice contest . . . **PT8CWA**. Excellent contest as always. 10 meter band was crowded . . . **PY2XC**. Tks fb test. I see you next year . . . **PY7OJ**. Thank you for nice contest! . . . **RA3BQ**. Transceiver home made, power 4.5W, antenna inverted-V . . . **RA3QH**. Unfortunately I could participate only one day in your contest but I got very good pleasure. I hope that we shall meet in the next year. All the best and 73! . . . **RA3XEV**. Nice call RM3F, readable. This is my new contest call! . . . **RM3F**. Good contest. Cu 2008! . . . **RU4WE**. Was surprised fb propagation on 10m. Tnx to all calling me. See you next year . . . **RV2FW/1**. Good contest. See in the next year! . . . **RV3LO**. Nice contest! . . . **RV3MI**. When on the evening of the second day after a power break I lost whole day QSOs (at about 2000 QSOs) I gave up! Next time better . . . **S50R**. FT-920 Challenger 811, 3-el, 3-band Yagi 30m high (too high, hi!). Too much static in USA direction on Saturday afternoon and in all directions on Sunday. Too many thunderstorms all around and on my location. Power cut, etc., you can't fight . . . **S51J**. Never work in worse condition . . . **S58A**. High noise level from thunderstorm. Second night surprised with strong NA signals but due to the 36 hour rule had planned for rest. However I like the 36 hour rule; you must plan ahead to be on the bands at the right time which also is a part of the competition . . . **SC3N**. Nice to test my 4-el Yagi for the first time. Lots of rotations . . . **SM5BRG**. Difficult condx this year. See you in the WPX SSB/CW/RTTY 2008! . . . **SN6Z**. Lucky for me my Writelog has great decoder for CW, so therefore I was able to participate. Unbelievable CW speed some send. But my CW ability is slowly returning. This is great fun and much easier to break through than on RTTY . . . **TF3AM**. There were hours in this contest where I struggled to work ten QSOs and other hours where my 5 watts seemed to work the world with one call. Thanks to Keko (TI5KD) and his wonderful wife Sophie for hosting me in the 5th year of doing this contest from there . . . **TI5N**. Very poor propagation . . . **UAØQBR**. Tnx for fb WPX contest 2007 . . . **UAØZAM**. Fb 28 MHz QSOs! . . . **UA3AKI**. Not bad condition on 10m. Much fun as usual . . . **UR5IKN**. Cool contest . . . **UTØRM**. Vry QRN, vry difficult to work. Rig homemade transceiver, 3-4W out, antenna 40m long lw, 45 degrees to gng . . . **UT5UUV**. Good contest, thanks . . . **UX4E**. Very modest equipment here: ICOM 756PRO III, Ten-Tec Centurion amp, and a full-size 40m vertical . . . **N2WQ/VE3**. My first contest operating from Oceania . . . **VK2CCC**. I could have done without the electrical storms here in Queensland . . . **VK4EJ**. G'day to all in the test. I seem to be in a propagation desert . . . **VK4TT**. This was

the first time a special prefix had been authorized for use from here. Hopefully there will be more to come . . . **VQ97JC**. Enjoyed another contest of great interest . . . **VU2UR**. With the conditions, after 23 QSOs on 40m with 100W I understood I was on for hard work all band so I went SOSB 20m LP and some sleep! Three goals achieved: 1000 QSO mark and 1,000,000 pts, and have some fun! This is enough for my age! . . . **XM2FU**. Work commitments on 1st day and static noise from thunderstorm on 2nd night dramatically limited my op hours. Tks for the great ears of the superstations and a great contest. Cu agn next year . . . **YB6LD**. Very strange propagation in Latvia. Cu agn next year! . . . **YL2BJ**. Tested new location but it hasn't fulfilled expectations. It turned out it's not good. Anyway some new countries on few bands and lots of fun. See you next year . . . **YT1BX**. Bad condition in 10m . . . **YV7QP**. Thanks to all concerned in running the contest . . . **ZC4LI**. Enjoyable as usual! . . . **ZL2AL**. A tough contest with poor condx for us. Our raw Multi-Multi score of 10.8M is 10% lower than last year's Multi-Two and much lower than our OC record of 16M. The under-performing bands were 10m, 15m, and 160m with some frustrating one-way propagation . . . **ZL6QH**. Poor band conditions for 5-band dipole. Thank you. See you in CQ WW as ZS9X . . . **ZS4JAN**. Even the 10 meter band was open (for a short time) . . . **ZS6C**.

WVE QRM

My first WPX in a very long time. Many thanks to K5HAB and W5HAB for letting me visit and operate . . . **AA5B**. I only got to operate for an hour or two with my MFJ-9020 but I had a lot of fun! . . . **AA5TB**. Always fun. QRN a little high. Did better than last year and look forward to the next. Thanks to all . . . **AA7FK**. Slow going on Friday night and Saturday morning, but a big improvement in conditions by Saturday night. Thanks to all the ops who make it a great event . . . **AB3CX**. Condx not bad, except for the thunderstorms which came through 1.5 hrs before the end. Equipment problems abounded. Apologies to all those who had to decipher my lousy CW. Also noticed that AB3EI is a terrible contest call. See you next year (with a new call) . . . **AB3EI**. Running KW to 160m Windom antenna . . . **AC4TT**. I didn't have much time to operate but it was a good test for QRP and condx. At least you can use my log as a check list. Cu agn . . . **AC5ZQ**. Horrible band conditions made it hard to sit at the radio for long periods . . . **AD6WL**. This was like two separate contests, one in EU and another in NA! . . . **AK1W**. First contest I had to wear glasses to see small fonts on the screen. hi . . . **K0GEO**. I was all set to go with automated contesting (first time) and my computer crashed! Spent most of the weekend recovering everything. Finally go it going again and was able to almost make my score from 2006. My setup has improved, so I'll be ready to compete next year . . . **K0LDS**. Glad to hear signals on 10 and 15! . . . **K3GW**. Band conditions were good for QRP. Total operating time (including listening) = 15 hours . . . **K3TW**. Great fun; had a blast! . . . **K4OD**. Had the flu and wasn't sure I was going to operate at all, but this was so much fun I managed to keep at it on and off all weekend. All S&P. Next time will try some running too. My Hexbeam started acting strange on Sunday and found a branch had snagged it . . . **K4XD**. Used WW II vintage hand-key, a little sloppy at times . . . **K5BZH**. Didn't have as much contest time as I would have liked, but had fun anyway with my K2 at 5 watts to inverted-L . . . **K5OI**. Band condition not good here Sunday morning. Got better toward the last 2 hours. A real challenge with no visible antenna permitted in my mobile home park

. . . **K6CSL**. My first WPX! Elecraft K2 running 5W to Hustler 6BTV on my roof about 20 feet up. Two tuned radials for every band except 80m, which has none. My roof is too small! Good fun even if conditions made QRP very challenging . . . **K6DBG**. It wasn't until about ten minutes after this one started that I even realized I wanted to make a few contacts. I opened Writelog, got the message buffers ready, and sat down to see how I would fare for a few before I got to other things. the YL planned . . . **K6JEB**. GAP vertical few feet from palm trees, 250 foot coax . . . **K7LV**. Great contest at the bottom of the cycle! 15 meters needed help! Nice to work the 7XØ on 80 and have the J28 call me on 20. Thanks for the great time! . . . **K8GL**. Fun contest using a random wire and 25 watts. Best results to everyone and 73 till next year . . . **KA3DRR**. Tnx all wonderful time. Cu next year . . . **KB9YGD**. Horrible conditions. Heard many EU stations that did not hear me. Heard zero JA's or OC . . . **KC7UP**. First time in this contest. Lots of fun! Can't wait for next year! . . . **KC8SQC**. What a difference between this year and last year! Last year 5027 QSOs, including 2223 on 20 and 1195 on 15. For me the highlight of the contest was the great conditions on 80 Friday night! We had 232Q's on 80 last year and 480 this year . . . **KD4D**. Very part-time effort (5.4 hours) with QRP and horz. loop. Not much DX but fun to play between work and graduation events for daughter . . . **KD4HXT**. I enjoyed the contest, but hoping for better condx . . . **KD7GIM**. First effort at a real contest . . . **KE4KY**. Wow. I loved this contest. A lot of fun. I'm hoping I place in the Rookie category! . . . **KE5FRF**. Had fun puttering in the test and fighting QSB on this holiday weekend . . . **KG6HAF**. Operated from K5CM with the Muskogee Amateur Radio Club call . . . **KK5I**. Combined some report writing and the WPX on 10 meters. Worked out great . . . **KN4Y**. Fewer Q's this year and fewer points per Q results in less score from more operating time . . . **KO0U**. Thanks to Ranko, YT6A/4O3A for letting me break in his new U.S. callsign . . . **KO3A**. After 13 years away it is nice to be back. Operated with only ground-mounted vertical and KW. Boy did I miss the fun! . . . **KQ8M**. If I knew that I was going to be this close to 1 million points I would have taken a shorter lunch and dinner break! . . . **KR2Q**. Limited time in this one. Propagation was non-existent until around 2100Z the last day. I still enjoyed taking part . . . **KS0M**. Here it is late May and a pipeline to West Africa on 40m from MT. Got 5D5A on first call right after QSYing from 20. Flipped the dial once and there he was. Now that's the way I like to work a new prefix! . . . **KS7T**. Some on the East Coast see the WPX as a combination of two contests, DX and SS. When the DX slows down they shift to running stateside stations. In that view the past WPX was the best of all possible worlds for them. . . . **KS9K**. Tough conditions with low power and TH7! . . . **KZ9O**. My 6th year doing WPX CW seriously. Claimed 2M+ points every year except 2003 in which I claimed almost 1.7M. This year 1384M claimed, mediocre by comparison. I was fatigued and distracted by non-ham-radio demands before the contest and felt slow . . . **N3UM**. With tribander 20K more points than last year! . . . **N4DXI**. Fun, relaxed effort. 99% S&P; can't run with the big dogs! . . . **N4PSE**. Despite high line noise half-decent conditions Sunday on 20 allowed me to have a few minutes of fun for the first time in a long time . . . **N4TO**. Activity seemed down because of low sun spots and higher than normal K-index. Enjoyed using Super Duper contest program . . . **N4UH**. First ever CW contest. Had a blast. See u next time! . . . **N4VZ**. Station location at K5GO . . . **N5RR**. Only had a little time to play. Fair to good conditions. Great fun . . . **N6AJR**.

Fun to play for a while in the contest. One of these days I will try a full weekend operation . . . **N6AN**. What fun. I love CW . . . **N6MUF**. This was certainly one of the more grueling contests I've been in. Friday night I bailed at about 10 PM local as I just wasn't getting anywhere. I heard later that there was a great JA opening around midnight that I missed . . . **N6WG**. This was my fifth WPX contest, but I was in the hospital for the first 40 hours of the contest. Maybe next year . . . **N7EIE**. Really tough conditions with a simple shortened dipole at 35 ft. Lots of lightning/rain static Friday night with almost zero activity. Saturday night lower noise but same stations heard! In memory of Dave, W9LYA . . . **N9TF**. Great contest. I am looking forward to better condition next year. Thanks to all for the extra effort to pull me out of the bad conditions . . . **NA4C**. My best score yet. Thanks to all the patient ops! . . . **NE4M**. Surprised KH6ND and CX6VM came through the crashes on 160m. Surprised ZL6QH came through on 10m at all . . . **NE5D**. More fun every year . . . **NE6M**. This is my first contest operating from the motor home. A little different different than from the house with the large antennas. Rig IC-7000, antenna Tarheel 400 on roof of motorhome, software N1MM logger . . . **NK4CC**. Doug KO7P joined me again to operate NN7SS. We operated single radio with no "mult" radio. I had a slow start as the computer was sluggish and erratic and messed up responding to people and sending the exchange. We tried rebooting, quitting excess programs . . . **NN7SS**. First time out for us. Had a great time. Hope conditions are better next year! . . . **NQ2F**. No time with holiday, but fun when I did get on . . . **NR7DX**. Condx bad Friday night. Much better Saturday night. Always a great contest. Rig Heath HW-9, antenna Carolina Windom . . . **NU4B**. Great fun! . . . **NU4I**. The worst contest conditions ever experienced, but still fun . . . **NV1N**. Used the District of Columbia ARS callsign NW3DC on HF for the first time. Too many thought I was LW3DC, the curse of super check partial! . . . **NW3DC**. N3KCJ operating NY1Q at N3KCJ's Massachusetts address . . . **NY1Q**. I thought for the first 20 some hours that this would be a NA/SA contest only as condx into EU and Asia were nil. But Saturday evening 20m opened to EU, ZL, and JA vy strong. Sunday morning another fb opening all day into EU . . . **W0ETT**. It was wonderful to operate in the contest with Champ, E21EIC, who just passed his U.S. Extra class exam a few days earlier . . . **W1CU**. Had lots of fun. Good 20m openings and fair conditions . . . **W4UAT**. Nice contest. TS-480HX at 5W, 7-ele Yagi/longwire/dipole . . . **W5KDJ**. This is my favorite contest. I always enjoy it. Thanks for sponsoring it . . . **W5PQ**. Tnx fer the great fun! Cul es 73! . . . **W7SW**. Was portable in campground. QRP, FT-817, vertical wire/radials . . . **W8EH**. 10 and 15m QSOs for checklog only; made from mobile station . . . **W9WI**. Bands punky, but made some good catches, especially New Zealand . . . **WA8REI**. The W5KFT station suffered some lightning damage just before the storm. I limped to go part time and spend some time on repairs . . . **WC5T**. Fun as always but was working on updating antennas on long weekend so didn't get to operate as much as I would have liked. See everyone next year . . . **WF4W**. Had fun. Couldn't work much of the contest, but hope I gave some folks some new prefixes. God bless! . . . **WJ5K**. Great contest. Looking forward to next year! . . . **WK0P**. First time with club call WQ8RP. Lousy DX antenna (67 ft. center fed dipole fed with 450 ohm line). Did surprisingly well for a "so-so" contester and marginal setup . . . **WQ8RP**.
